WORKSHOP ITEM

Big Lake City Council

Prepared By: *Layne Otteson P.E., City Engineer* *ENG19-005*	***Meeting Date:*** 2/27/2019	***Item No.*** **4A**
Item Description: *Discuss 2020 Street Rehabilitation Project Programming*	***Reviewed By:*** *Clay Wilfahrt, City Administrator*	
	Reviewed By: *Mike Goebel, Public Works Director* *Deb Wegeleben, Finance Director*	

COUNCIL DIRECTION REQUESTED

Council to discuss and provide direction relating to initiating the project

BACKGROUND/DISCUSSION

Street reconstruction for 2020 has been identified in the current Pavement Management Plan and the Capital Improvement Program. There have been past discussions with Council and Public Works regarding deterioration of the existing pavement and water quality impacts. Many streets throughout the City have drainage challenges, high maintenance costs and segments turning to gravel.

This is the first step to begin the process. Discussion items include:

- Typical Project Life Cycle
- Design Engineer Process
- Budget
- Financing/Special Assessments
- Candidate Streets
- Tentative Schedule

Staff will bring back a project scope reflecting Council direction to a following work session and include refinements such as street selection and costs/assessments.

FINANCIAL IMPACT

Preliminary budget will be presented at the workshop.
